Sikelia / Byzas / Hagia

design Elena Salmistraro

Uno spunto per rileggere in chiave contemporanea l'opulenza decorativa del periodo storico segnato dalla Santa Bisanzio in Sicilia. Marmi, pietre dure e metalli si amalgamano sotto forma di geometrie semplici, dando vita a moderni pattern dalla forte valenza storica.

A starting point for the modern reinterpretation of the decorative opulence of the historical period identified by the sacred byzantine domination in Sicily. Marble, gemstones and metals mixed together in simple geometrical forms give life to modern patterns of great historical significance.
